# Jessica Rodrigues-Dlouhy

Software Engineer | Bilingual (Portuguese & English)

Hi, I am a Quality Analyst with +2 years of experience handling and resolving quality issues in both waterfall and agile teams. Currently, I am seeking opportunities to pivot from a tester to a developer role. I am a quick learner and have experience working in fast-paced environments. People skills are my greatest strength, I find it easy to connect and empathize with others in an appropriate way. In my previous experience, I've worked both in teams and independently, and I've found that having different insights was greatly important to achieving better results. At the moment, I am apart of She Codes Workshops and I have been learning JavaScript, HTML, CSS3, and getting exposure to Git and API concepts. I deeply believe that equality in tech is crucial for a positive environment and I am focused daily on closing this gender gap through Women in Tech initiatives.
